BREAKTHROUGH TO EXCELLENCE

Corporate Overview

OSNET Technologies Sdn Bhd is a Malaysian-based system integrator company founded in year 2009, an consulting based value- added reseller (VAR) aiming to fill the market need for network, security, data storage & Big Data. We emphasize heavily on managed services and support to our clients.

We currently operate our sales office in Menara 8Trium, Sri Damansara, and technical & helpdesk center in Bukit Segar, Cheras Kuala Lumpur.

FOR BUSINESS PEOPLE WHO WANT TO BE SURE THEIR IT INFRASTRUCTURE ARE ALWAYS WORKING RELIABLY, OSNET IS A VENDOR AND TRUSTED STRATEGIC ALLY WHO MAKES SURE THEIR SYSTEMS WORK, AND THEIR DOWN TIME IS MINIMAL.

Our Commitment

We need to offer a real alliance. The benefits we sell include many intangibles: confidence, reliability, knowing that somebody will be there to answer questions and help at the important times.

Vision & Mission

Our vision is to be a trusted and reliable information technology ally to our clients. OSNET's ongoing mission is to offer confidence, reliability, and timely support during crucial times to our clients. We strive to ensure our clients are able to run their businesses with maximum efficiency and reliability.

Management of Multivendor Technologies

As an independent systems integrator, OSNET partners with the world's leading vendors to provide the most advanced and flexible solutions, as well as acts as the single point of contact to manage multivendor technologies.

Our Focus Industries

Our strength lies in our market expertise that include the specialization in the following services: **ICT & ELV Infrastructure, Internet Connectivity, Software Development, Drone-as-a-Service & Nationwide Support.**

PLANTATION

EDUCATION

HEALTHCARE

Service & Support

Our strategy hinges on providing excellent service and support. This is critical. We need to differentiate on service and support, and to therefore deliver as well.

ICT Infrastructure

We architect, design, integrate and manage secure and resilient enterprise, data centre and service provider networks to connect users and support today's ubiquitous communication needs.

Performance Optimization

We improve the end-to-end performance of applications and services across communications networks.

Hybrid Cloud

Hyperconverged infrastructure that integrates compute, virtualization, storage, networking, and security to power any application, at any scale.

Unified Continuity

Back up content to secure Cloud, allow customer to easily recover a lost file or an entire business infrastructure in minutes.

Security Protection

Protects data and stops threats across devices, networks, clouds and on-premises environments

24x7 Proactive Monitoring System

We ensure the systems and networks continue to operate normally, recognize potential issues ahead of time, and avoid downtime.

Nationwide Support Centre

Our depth of service expertise, residence engineer is backed by 23 Nationwide Support Centers, which provide 7x24 multivendor support in local languages and local client knowledge.

IOT Tracking Platform

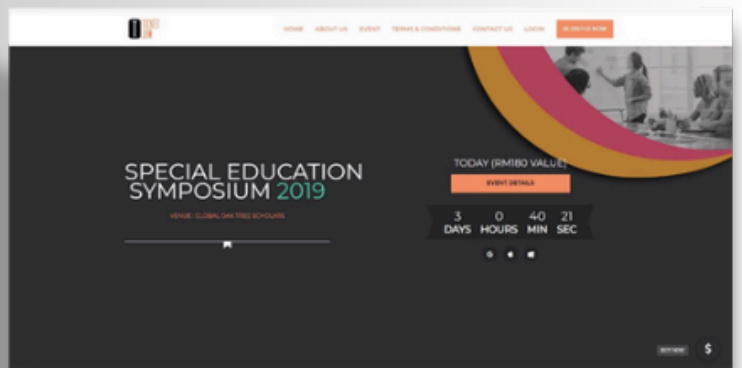

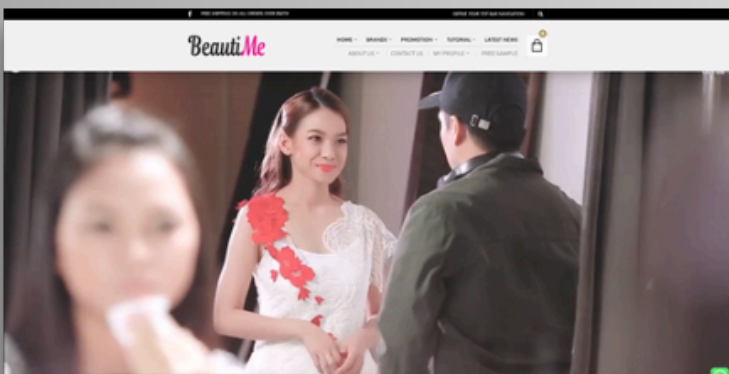

Customer Relationship Management

OSNET Customer Relationship Management (CRM) solution is a great fit for almost any company which has many features designed to fit many applications.

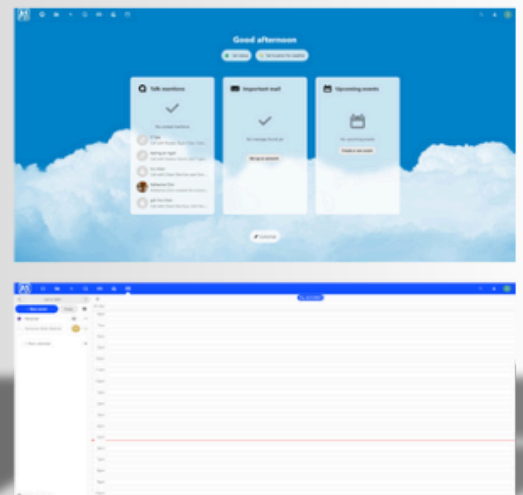

Business-to-Consumer (B2C) Solution

Electronic Document Management System

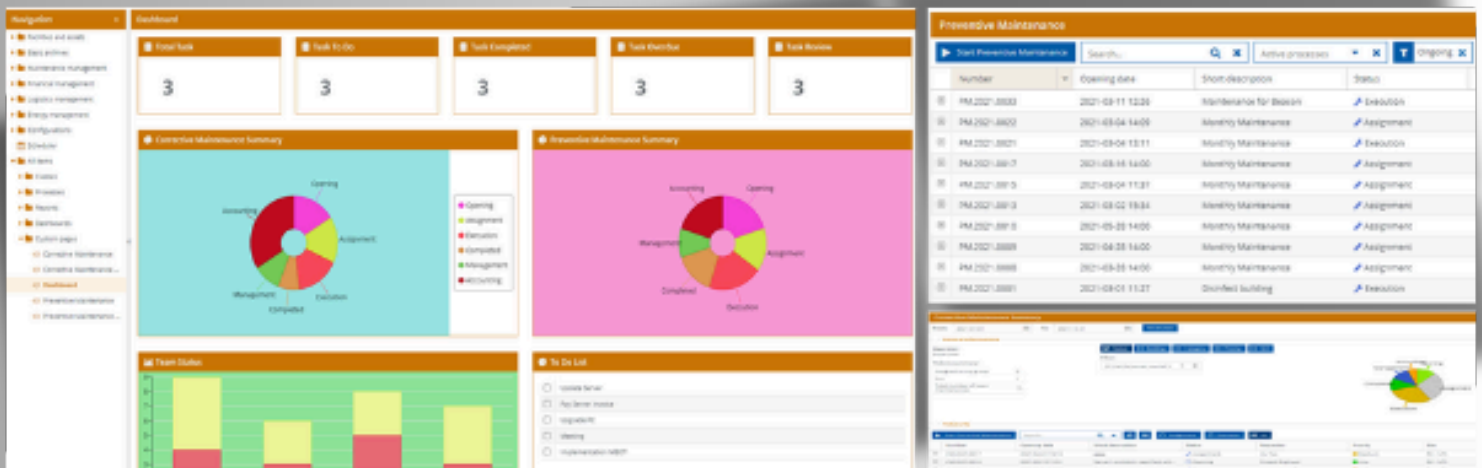

- OSNET Electronic Document Management System (EDMS) is a suite of client server software for creating and using file hosting services. It is enterprise-ready with
- comprehensive support options.

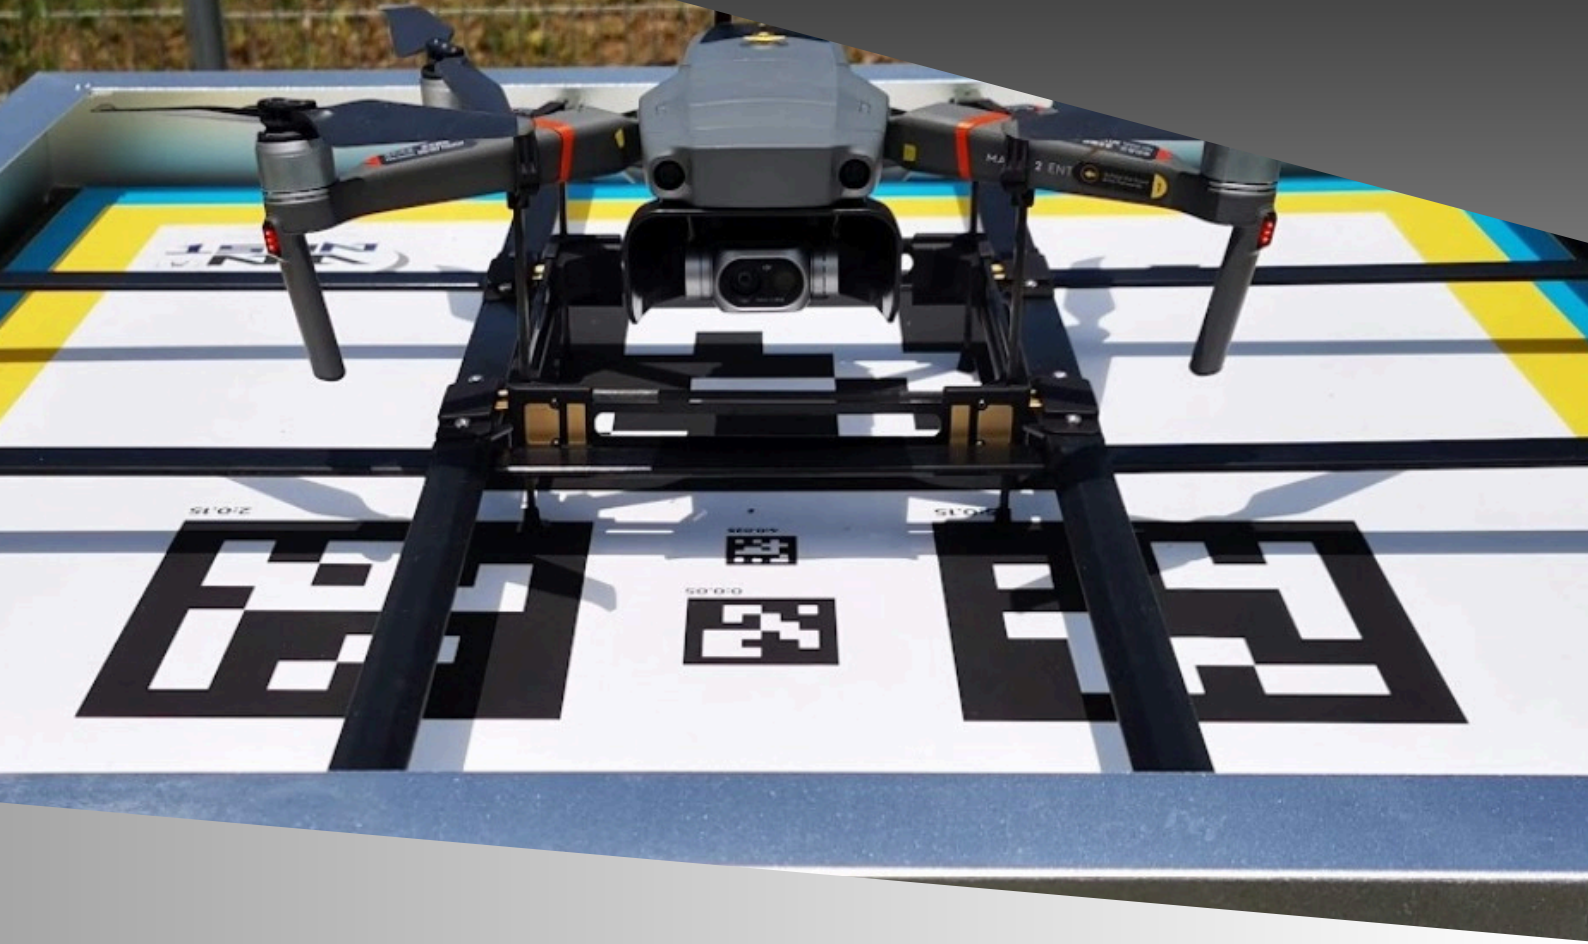

Computerized Maintenance Management System

- OSNET Computerized Maintenance Management System (CMMS) maintains a computer databases of information about an organization's maintenance operation.

Unmanned Automated Solutions (DRONE)

NEST DRONE Solutions

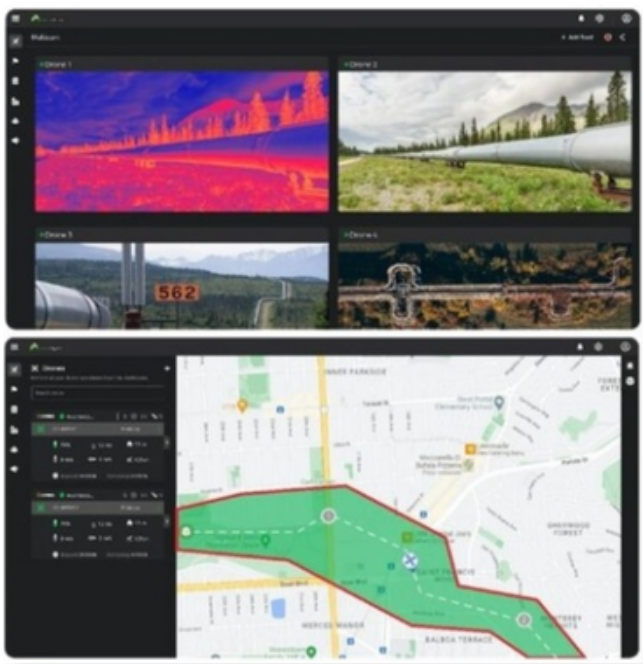

OSNET drone division are mainly formed with the philosophy of providing smart remote drone solutions. With our successful launch of hybrid technology between Drone Docking system and Drone Remote Flight Control System, the idea has now turned into a reality and the solution has been made available to ease controls of stationed drones remotely from anywhere, to minimize ad-hoc service and bring new idea to support our beloved clients.

UAV Solutions

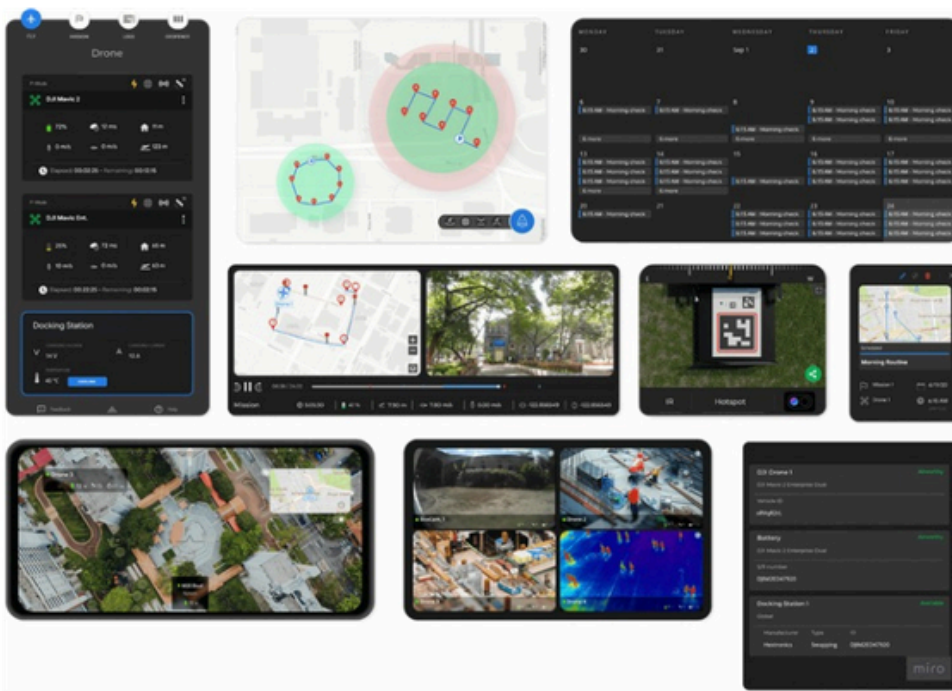

The fully Automated AI-Power Drone-In-a-Box system, conduct inspection & security tasks 24/7 without needing a pilot on site

- Scheduled mission run automation.
- IoT trigger based mission run.
- Pre defined zone & flight path.
- Manual remote take over.
- Automatic take off sequence.
- Automatic landing sequence.
- Battery recharge and video upload.

UAV Solutions

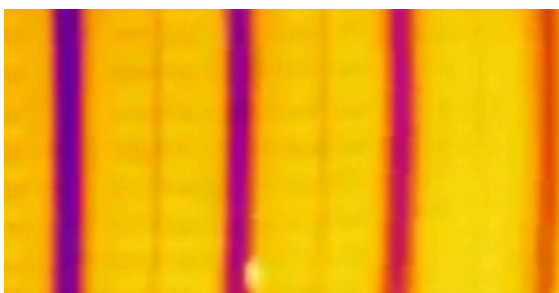

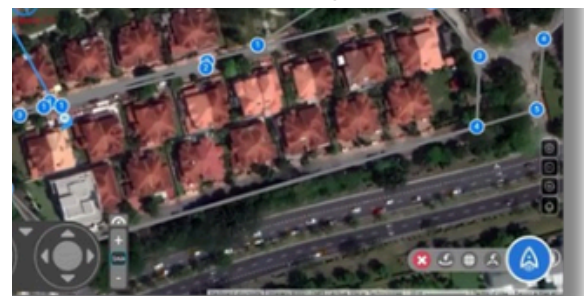

Nested Drone Application Featuring

Remote Inspection Construction Site

Parameters Security Surveillance

Routine Asset Inspection Solar Farm

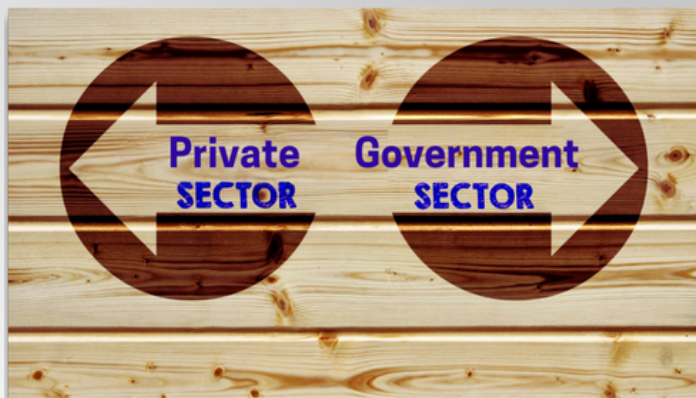

Automated Emergency Response

UAS Solutions

Collaborating with PEN Aviation as Drone operator , OSNET provide variants of ecosystem UAS Solution in different segment industries

Private

- Transport
- Logistic

(DaaS) Drone-as-a-Service

We improvise your business with address all possible pain points, furthermore we manageable bridge both internal & external gaps...

- Drone-as-a-Services (DaaS)
- Tailored UAV & Payloads
- Financing Insurance Resale
- Authorized Service Center (ASC)
- Authorized Training Organization (ATO)
- “FREEMIND” Guaranteed Maintenance Cost Program
- “DGMIND” Automation of Complex Business & Operation Complex Processes

(DaaS) Drone-as-a-Service

Enables enterprises to avail various of services from drone companies. This removes the need for them to invest their own money in drone hardware & software, pilot, and pilot training programs.

Supported Mission...

1. Smart Parameter Security Surveillance
2. First to last-mile port logistics
3. Search & Rescue Operation
4. Inspection and detection
5. Firefighting

- OPEX based model
- Regulatory Approval
- Assistance for integration in ERP
- Hardware and software maintenance
- Certified personnel, equipment and software
- UAV command, Control and Communication (CCC) Service

Strategic Partnerships

By developing strategic & mutually beneficial relationships with leading technology vendors such as our alliance partners listed below, **OSNET** Technologies is able to deliver to you a preferential access to the most advanced and flexible technology solutions available in the market.
